

The Most Compact and Economical High-Performance, High-Efficiency Centrifugal Compressors

Aerodynamic Blower Industry-Exclusive Drop-In Replacement Design:

Simple installation, retains existing hardware investments

Offering the lowest cost per cfm, the Inovair Drop-In Replacement Blower provides a wide range of airflow demands in pneumatic conveying applications and installations. Thanks to its advanced, high-efficiency centrifugal compressor technology, the Inovair Drop-In Replacement Blower can provide energy savings of 10 to 35% relative to positive displacement blowers.

- Economical Upfront Cost
- Sanitary Design
- Quiet Operation
- Low Discharge Air Temperatures

The industry-exclusive Inovair Drop-In Replacement Blower is designed, manufactured and serviced in Kansas City and is available now. Call today for more information.

- Industry-exclusive “drop-in replacement”, designed specifically for pneumatic conveying
- Energy Efficient: consumes 10-35% less power than PD Blowers
- Easily adapts to most existing PD blower stands / fixtures
- Allows re-use of existing motor, stand and filter silencer
- Quiet operation
- Patent pending mechanical airflow control
- Rugged design supports broad range of pressure (4 – 22 psi) and flow (400 – 2,200 CFM)

Inovair is the leading supplier of compressors for military and commercial aircraft deicing
