

#### The Most Compact and Economical High-Performance, High-Efficiency Centrifugal Compressors

35-50%  
Smaller Footprint

Electronic Controls,  
Available Data Monitoring

- Efficient: consumes 10 – 35% less power than PD Blower packages
- Compact footprint: 35 – 50% smaller than comparable positive displacement (PD) blowers packages
- Quiet operation
- Designed specifically for pneumatic conveying
- Rugged design supports broad range of pressure (4 – 22 psi) and flow (400 – 2,200 CFM)

Inovair is the leading supplier of compressors for military and commercial aircraft deicing

### Patented and Proven Centrifugal Compressor Technology for Pneumatic Conveying Applications

Offering the lowest cost per cfm, the Inovair Complete Blower System provides a wide range of airflow demands in pneumatic conveying applications and installations. Thanks to its advanced, high-efficiency centrifugal compressor technology, the Inovair Complete Blower System can provide energy savings of 10 to 35% relative to positive displacement blowers.

- Economical Upfront Cost
- Sanitary Design
- Quiet Operation
- Low Discharge Air Temperatures

The Inovair Complete Blower System is designed, manufactured and serviced in Kansas City and is available now. Call today for more information.
